

fuerte | pro

The Pro Electrofusion Welder is a high-end, advanced welding solution designed for demanding applications. Equipped with a barcode scanner, manual welding capabilities, and automatic welding control, this device offers unparalleled precision and flexibility.

The Pro features a high-resolution TFT screen, fitting control, and checks for resistance, current, and voltage, ensuring accurate and reliable welds. With a robust electrical protection class of IP 54 and high voltage protection, this device is built to withstand harsh environments.

FEATURES

- Data Saving
for up to 10.000 weldings aproximately
- Barcode scanner
- Manual welding
- Automatic welding Control
- TFT screen, multi language
- Resistance check, Voltage check
Current check

PRO ELECTROFUSION WELDER

Technical Specification

Input Voltage	230v (185v-275v)
Frequency	50 Hz - 60 Hz
Electrical Protection	IP54
Primary Current	16 A
Secondary Voltage	8V - 48V AC
Coupling Size Range	20mm - 1200mm

Mechanical Information

Dimensions [WxDxH]	340 x 220 x 310 mm
Weight	18.5 - 20.0 kg
Welding Cord	9+2 hibrit NYAF (4 mt)

Code	Power	Maximum Current	Weight
F-180	3000 VA	60 A +%15	18.5 KG
F-500	3600 VA	70 A +%10	19.0 KG
F-800	3800 VA	80 A	19.5 KG
F-1200	4000 VA	100 A	20.0 KG
